ABOUT US

Geneva International is a true distribution partner to the oil and fuel industry. This partnership is evidenced by senior level stewardship of each transaction, trusted long-standing industry relationships and financial stability.

Senior Level Stewardship. Geneva International top level management personally oversees every transaction with both suppliers and buyers. This ensures open lines of communication, accuracy of orders, responsiveness to customer needs, timeliness of deliveries and maintaining the highest ethical standards.

Our executives regard our customer's business as highly as we do our own so we provide the highest level of personal oversight and diligence to ensure the success of every transaction. This approach has gained Geneva International a reputation as a trusted distribution partner, earning increasing levels of repeat business from customers around the globe.

Trusted Long-Standing Industry Relationships. Geneva International has over 30 years experience and connections in the oil and fuel industry, as well as related industry infrastructures, such as equipment and transportation. These connections give Geneva International a trusted network within which to operate and ensure just-in-time delivery of quality products. We have robust customer relationships across the globe, and have developed particularly strong transportation partnerships in Mexico to ensure product delivery without incident

Financial Stability. At Geneva International, we maintain a close banking relationship with a top 25 international bank which provides fully secured financial transactions for both buyer and seller. Geneva International has the financial wherewithal to pre-pay suppliers 100% of orders.

“What you need, when and where you need it. No excuses.”

-Tom Stevenson

Your Partner Across the Globe

A close-up photograph of a metallic, ribbed surface, likely a pipe or tank, showing signs of wear and discoloration. The image is overlaid with a green geometric pattern consisting of several overlapping triangles and parallelograms. The word "OIL" is written in white capital letters on one of the green shapes.

OIL

OIL PRODUCTS

Base Oils

Geneva International sources the base oils that often remain when the rest of the crude oil is transformed into diesel fuel, jet fuel and more. The American Petroleum Institute (API) has categorized base oils into five categories (API 1509, Appendix E). The first three groups are refined from petroleum crude oil. Group IV base oils are full synthetic (polyalphaolefin) oils. Group V is for all other base oils not included in Groups I through IV. Each group works better for different uses.

API BASE OIL CATEGORIES					
Base Oil Category	Sulfur %		Saturates %	Viscosity Index	Process
Group I	>0.03	And/or	<90	80 to 119	Solvent Refined
Group II	<0.03	And	>90	80 to 119	Hydro-treated
Group III	<0.03	And	>90	>120	Hydro-cracked
Group IV	Polyalphaolefin (PAO) Synthetic Lubricants				Chemical reaction
Group V	All other base oils not included in Groups I through IV				

Mineral

Synthetic

OIL PRODUCTS

Pale Oils

Pale oils are a base oil stock which are highly naphthenic in content (in contrast to the more common paraffinic base oils.) They are lower-gravity, wax-free oils that are used in moderate temperature applications, mainly for manufacturing metal working fluids, greases and other industrial and anticorrosion fluids.

Certificates of Analysis (COA)

Geneva ensures the quality of all products ordered and provides COA's with each transaction.

Certificate of Analysis - Pale oil (Clear)			
TEST	METHOD	UNITS	RESULT
Density (15°C)	D-4052	Kg/dm3	0.8127
Specific Gravity (60°F)	D4052	SG	0.8124
API Gravity	D-1298	°F	43.27
Flash Point	D-93	°F	194
Viscosity (40°C)	D-7042	cSt	3.1
Color	D-1500	N/a	0.5
Ash	D-482	%Mass	<0.008
Total Acid Mg KOH/g	D-974	mg KOH/g	<0.01
Sulfur	D-4294	ppm	1
Pour Point	D-97	°C	<-60
Water (CKF)	D-6304	Ppm	42
BTEX (direct Inject)	SW-8468260B	ppm	Nd

FUEL PRODUCTS

FUELS

Geneva International sources all varieties of fuel products. Oils and Diesel Fuels are broken down by numbering system, categorized by API Gravity (weight and viscosity), as well as BTUs.

- #1 - #1 Fuel oil, Kerosene, jet fuel, #1 Diesel, #1 heating oil
- #2 - #2 Diesel, #2 Heating Oil
- #4 - #4 Diesel, this is heavy oil used in large marine applications
- #5 - #5 Fuel oil, also known as bunker oil, residuum, for ship boilers
- #6 - #6 Heavy Oil, #3 heavy bunker oil, residuum, for boilers

Diesel

Diesel or Diesel fuel in general is any fuel used in diesel engines. The most common is a specific fractional distillate of petroleum fuel oil, but alternatives that are not derived from petroleum, such as biodiesel, biomass to liquid (BTL) or gas to liquid (GTL) diesel, are increasingly being developed and adopted.

D6

D6 is also known as residual fuel oil and is of high-viscosity. This particular fuel oil requires preheating to 220 - 260 degrees Fahrenheit. D6 is mostly used for generators. Since it requires pre-heating, it can't be used in small boats or cars. However large ships and power plants can use the residual fuel oil.

D2

D2 is also known as gas oil. It is made from refinery Distillate #2. This type of fuel can be used without additives or reformers. D2 is primarily used in diesel engines.

Jet Fuel

Jet Fuel is a Kerosene-type, high-quality product used primarily as fuel for commercial turbojet and turboprop aircraft engines.

BioDiesel

Biodiesel is an alternative fuel formulated exclusively for diesel engines; it's made from vegetable oil or animal fats. Biodiesel can be mixed with petroleum diesel in any percentage, from 1 to 99, which is represented by a number following a B. For example, B5 is 5 percent biodiesel with 95 percent petroleum, B20 is 20 percent biodiesel with 80 percent petroleum, or B100 is 100 percent biodiesel, no petroleum.

BUSINESS SERVICES

BUSINESS SERVICES

All Geneva International transactions include the following business services to ensure quality product delivery and transparency.

- Formalized quotes and invoicing procedures
- Certificate of Analysis
- Bills of Lading at both supplier and delivery destinations
- Reconciliation processes for product that expands/contracts during transit.
- 24/7 access to Geneva International top management
- Insurance and bonds to cover product during transit
- Export permits, taxes and insurance required for international business transactions

Geneva International provides a full range of transportation alternatives

- By Ship
- By Rail
- By Truck
- By Pipeline

Especially Strong Network in Mexico

While Geneva International ships product all over the world, we have an especially strong and trusted network in Mexico where we can ensure product delivery without incident. That network includes routinely shipping to the following destinations where product is trans-loaded to buyer's trucks for delivery to Mexico: LaFeria, TX, Rio Grande, TX, Laredo, TX, Brownsville, TX, and Three Rivers, TX.

A low-angle, upward-looking photograph of several tall skyscrapers against a clear blue sky. The buildings feature glass and steel facades. A large, semi-transparent green geometric overlay, composed of several overlapping triangles and polygons, covers the right side of the image. The text 'CORPORATE STRUCTURE AND GOVERNANCE' is written in white, bold, sans-serif capital letters across the middle of this green area.
